Email: jayachandugolla2005@gmail.com

Github: <https://github.com/jayachandu2005>

Mobile: [+91 9154361970](tel:+919154361970)

SKILLS

Languages: SQL, C++, Data Structures and Algorithms(DSA), Python(NumPy, Pandas),Ui/Ux.
Frameworks: Power BI, Tableau, Excel, PowerPoint, Figma, Jupyter Notebook.
Tools/Platforms: MySQL, VSCode, Anaconda Navigator , Google colab,Docker.
Soft Skills: Decision-making, Teamwork, Project Management, Adaptability.

PROJECTS

Loan Eligibility Prediction | *Python, Machine Learning, Predictive Analysis* | [Github](#) Dec' 25

- Preprocessed loan datasets using **Pandas and scikit-learn**, handled missing values and encoded categorical variables to improve model reliability.
- Built a classification model to predict loan approval using features like **income, credit history, dependents, and loan amount**, achieving strong prediction accuracy.
- Performed data analysis and visualization to identify key factors influencing loan eligibility and support model performance evaluation.

Sustainable Fashion Brand Analysis and Clustering | *Python, Data Analysis* | [Github](#) Oct' 25

- Performed **data preprocessing and exploratory data analysis (EDA)** on sustainable fashion datasets using **Pandas and NumPy** to identify key sustainability patterns.
- Applied **K-Means clustering techniques** to group fashion brands based on environmental and business attributes, improving segmentation and comparative analysis of sustainability performance.
- Generated insights through **cluster profiling and correlation analysis**, helping identify key sustainability indicators influencing brand positioning and decision-making.

Car Price Analysis And Prediction | *Python, Data Analysis* | [Github](#) Apr' 25

- Performed **data preprocessing and exploratory data analysis (EDA)** on car datasets using **Pandas, NumPy, and visualization libraries** to identify key factors affecting car prices.
- Built a **regression-based machine learning model** to predict car selling prices using features such as **fuel type, transmission, ownership history, and kilometers driven**.
- Evaluated model performance using statistical metrics to improve prediction accuracy and support data-driven pricing insights.

TRAINING

Think Design Prototype on Design Thinking & Figma (MindMitra) | [Link](#) Jun' 23 – Jul' 23

- Applied the **Design Thinking process** (empathize, define, ideate, prototype, test) to design a student-focused mental health support application addressing stress management and well-being needs.
- Created **12 high-fidelity mobile UI screens** in **Figma**, including onboarding, mood tracking, chatbot support, journaling, and peer interaction features to enhance user engagement.
- Developed interactive **wireframes and user journey flows**, improving usability and accessibility for student users through structured prototype testing and feedback integration.

CERTIFICATES

The Bits and Bytes of Computer Networking | Coursera | [Link](#) Aug' 25

Public Speaking with Canva | Coursera | [Link](#) Mar' 24

ACHIEVEMENTS

HackerRank: Achieved a 3-star rating(SQL,Python).

Hackathon: InnovateX - A 24 hours Hackathon.

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology Aug' 23 – Present

Computer Science and Engineering; CGPA: 6.13

Sri Chaitanya Techno School Vishakapatnam, Andhra Pradesh
Intermediate Jun' 22 – Mar' 23

PCM; Percentage: 65%

Sri Chaitanya Techno School Rajam, Andhra Pradesh
Matriculation May' 20 – Apr' 21

Percentage: 99%
